PROFESSIONAL SUMMARY

Results-driven Java Full Stack Developer with strong backend expertise in Spring Boot ecosystem and RESTful API development. Proficient in building secure, scalable applications with modern authentication mechanisms, database management, and cloud deployment, delivering end-to-end solutions from conception to production.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS
Frameworks & Libraries: Spring Boot, Spring MVC, Spring JPA, Spring Security, React
Databases: MySQL, MongoDB
Tools & Technologies: Git, GitHub, Maven, Postman, AWS, JWT Authentication

PROJECTS

Full Stack Food Delivery App | *React, Spring Boot, MongoDB, AWS, RazorPay*

- Engineered a comprehensive food delivery platform with real-time order tracking, secure payment integration via RazorPay, and role-based access control for customers and administrators
- Deployed microservices architecture on AWS with MongoDB for scalable data management, handling concurrent user sessions and optimizing API response times by 40%
- Implemented secure JWT-based authentication and authorization, ensuring data privacy and seamless user experience across the application

Money Manager App | *React, Spring Boot, MySQL, Render, Netlify*

- Developed a personal finance management application enabling users to track income, expenses, and budgets with intuitive data visualization and category-based filtering
- Built RESTful APIs with Spring Boot and MySQL for efficient transaction management, deployed backend on Render and frontend on Netlify for reliable performance
- Integrated responsive UI components with React, enhancing user engagement and providing real-time financial insights through interactive dashboards

Full-Stack Resume Builder | *React, Spring Boot, RazorPay, JWT Auth, PDF Download*

- Created a dynamic resume builder platform with premium template access through RazorPay payment gateway integration and secure user authentication using JWT tokens
- Implemented PDF generation functionality with customizable templates, enabling users to download professional resumes instantly after completion
- Architected RESTful backend services with Spring Boot for user data management, template rendering, and transaction processing with 99.9% uptime

ACHIEVEMENTS

- Solved 250+ problems on LeetCode, demonstrating strong problem-solving abilities and algorithmic proficiency
- Built 3 full-stack production-level projects with modern tech stacks, deployed on cloud platforms with real-world usage
- Ranked top 5% in college hackathon, showcasing technical innovation and collaborative development skills
- Consistently improved DSA skills with daily practice, maintaining an active learning approach to computer science fundamentals

EDUCATION

JB Knowledge Park — Palwal, Haryana
Bachelor of Technology in Computer Science Engineering — *Aug 2023 – Jun 2027*
